API 510 – Pressure Vessel Inspection and Evaluation Program ATS is a leader among Pressure Vessel Inspection Companies. Our API inspectors have been properly trained and certified, and frequently perform API 510 pressure vessel inspections.

~~API 510 Pressure Vessel Inspection – Applied Technical ...~~

If you have a pressure vessel that was built in accordance with a vessel code, such as ASME Section VIII, you will need to be prepared for the API-510 pressure vessel inspection. This code applies to most refining and chemical process vessels that have been placed into service. Vessels that fall under this inspection are required to have a name attached with an ASME stamp on the plate, and they normally have an internal pressure greater than 45 pounds

per square inch (PSI).

## ~~API 510 Pressure Vessel Inspection Environmental Works~~

When evaluating widely scattered pits as part of an API 510 FFS analysis of corroded regions in a pressure vessel, the following data was recorded during the current inspection: inside diameter of 4 feet, required thickness of 1 inch, corrosion allowance of 0.125 inches, all pits are contained in an 8-inch diameter circle, no pit is greater than  $\frac{1}{2}$  the required thickness, but all pit depths exceed 0.125 inches, and the sum of the pit dimensions is satisfactory.
