Discover the personality archetypes within you and improve your life and relationships with a new self-guided system of personal transformation. In Traditional Chinese Medicine (TCM) philosophy, the elements Wood, Fire, Earth, Metal, and Water are the foundation of how nature grows and evolves. They are believed to help us understand everything from illness and healing to the fundamental processes of child development—and they continue to inform Chinese medicine practice today. But as Ayurvedic nutritionist, reiki master, and Tournesol founder Carey Davidson demonstrates in this book, each of the five elements can also be seen as a personality archetype—and inside all of us is a unique blend of these archetypes that serves as a window into living a more fulfilling life on every level. In The Five Archetypes, Davidson explains that by knowing the personality traits associated with each type and using what she calls the Five Archetypes method, you can actually start to predict your behavioral patterns—not only with yourself but also with your friends, your romantic partner, your children, and even your colleagues. By practicing this method, you will also: -Learn how to exercise more control over behaviors that thwart your potential -Hone your self-awareness and self-regulation skills in the face of day-to-day stress -And understand what really makes people tick, so that you spend less time in stagnant relationships and more time in gratifying ones Through her study of the elements and the observations she ' s made in her work with individuals, couples, companies, parents, kids, and educators, Davidson has created a simplified and practical guide to harnessing the strengths of our five archetypes. Complete with an assessment designed to help you discover your primary, secondary, and lowest types, The Five Archetypes will not only teach you more about yourself and others but also transform your relationships and set you on the path to personal and interpersonal harmony.

In Archetypes of Astrology, author Ena Stanley blends the themes of planets, signs and houses with their ancient mythological origins in a way that provides a useful and interesting introduction to the basics of astrology for readers who have little or no prior experience with astrological techniques. At the same time, she offers an enriching and enjoyable reading experience for advanced students and professional astrologers, or for readers whose primary interest is mythology. In the opening chapter, involving the evolution of astrology into the modern day, the reader is drawn in with Stanley's explanation of the patriarchal matrix and the matriarchal matrix and how in modern astrology, both have been blended into a workable paradigm. From there she shares how she began to develop her sense of the twelve basic astrological archetypes through her studies of psychology and of astrology, in particular with Zipporah Dobyns, Ph.D. In the chapters that follow, each of twelve basic archetypes blend astrology with a wealth of imagery through stories of myths that are rich in metaphor, adding new dimensions to our understanding of the signs, houses and planets of basic astrology. The mythologies behind Sun, Moon and the seven planets are further augmented with the correlations of dwarf planet Ceres and asteroids Pallas, Juno and Vesta with the 6th and 7th archetypes. Additionally, as the author points out in her concluding chapter, the study of myths and archetypes takes us into a greater understanding of motivations and behavior-to the essence of counseling astrology.
