Updated February 17, 2019. In Bloom's Taxonomy, the analysis level is where students use their own judgment to begin analyzing the knowledge they have learned. At this point, they begin understanding the underlying structure to knowledge and also are able to distinguish between fact and opinion. Analysis is the fourth level of the Bloom's taxonomy pyramid.

First is reasonably well correlated with a pupil's level of educational disadvantage, using a different socio-economic indicator based around the proportion of pupils eligible for free school meals over the past three years may slightly improve Teach First's targeting of schools with high levels of educational disadvantage.

A comparison of commonly used socio-economic indicators ...

At this first level of coding, you are looking for distinct concepts and categories in the data, which will form the basic units of your analysis. In other words, you are breaking down the data into first level concepts, or master headings, and second-level categories, or subheadings. Researchers often use highlights to distinguish concepts and categories.

Qualitative Coding & Analysis | Research Rundowns

Educational research refers to the systematic collection and analysis of data related to the field of education. Research may involve a variety of methods and various aspects of education including student learning, teaching methods, teacher training, and classroom dynamics. Educational researchers generally agree that research should be rigorous and systematic. However, there is less agreement about specific standards, criteria and research procedures. Educational researchers may draw upon a va
