Guide Google Sketchup

Guides are useful for lining up things, making things the right size, and generally adding precision and accuracy to what you're building. In previous versions of SketchUp, guides were called construction geometry, because that's basically what they are: a special kind of entity that you create when and where you need them.

How to Use Guides in Google SketchUp 8 - dummies

Linear guide lines: To create a guide along an edge in your model, click anywhere along the edge except on either of the endpoints, and then click again anywhere else along the edge. Guide points: You may want to place a point somewhere in space; you can do exactly that with guide points. With the Tape Measure tool, click an edge's endpoint, and then click again somewhere else.
