You can ' t change the past. . . . When Michael fires his new rifle into the air on his seventeenth birthday, he never imagines that the bullet will end up killing someone. But it does—and Michael ' s world is changed forever. Desperate, he wrestles with his guilt and keeps silent as his life begins to fall apart. When Jenna ' s father is killed in a freak Fourth of July accident, she ' s devastated. As she grieves, she tries to understand why she no longer feels comfortable with her boyfriend, Jason, and why a guy named Michael keeps appearing in her dreams. . . . Swallowing Stones is a haunting novel about choices . . . and devastating consequences.

Sweet college student Morinaga believes that his crush on his mentor Tatsumi will forever go unrequited, until one night of passion leads to a burgeoning relationship between them.

A frequent contributor to the New York Times magazine, Outside, Salon, and GQ, and a regular on Public Radio International's "This American Life," David Rakoff's debut collection of essays is simultaneously laugh-out-loud funny and take-your-breath-away poignant. David Rakoff is a fish out of water. Whether he finds himself on assignment climbing Mount Monadnock in New Hampshire — donning a pair of Timberlands for his trek, only to realize with horror that "the shoes I wouldn't be caught dead in might actually turn out to be the shoes I am caught dead in." — sitting quietly impersonating Sigmund Freud in a department store window...for a month, or musing on the unique predicament of being undetectably Canadian in New York City ("...what's more spicy than being Canadian, I ask you?"), Rakoff has a gift for exposing life's humour and pathos. Fraud takes us places even we didn't know we wanted to go: expeditions as varied as a search for

elves in Iceland, a foray into soap opera acting, or contemplating the gin-soaked olive at the bottom of a martini glass. With the sharpest of eyes, David Rakoff explores the odd and ordinary events of life, spotting what is unique, funny and absurd in the world around him. But for all its razor-sharp wit and snarky humor, *Fraud* is also, ultimately, an object lesson in not taking life, or oneself, too seriously.

The long-awaited sequel to the "Concepts and Practice of Mathematical Finance" has now arrived. Taking up where the first volume left off, a range of topics is covered in depth. Extensive sections include portfolio credit derivatives, quasi-Monte Carlo, the calibration and implementation of the LIBOR market model, the acceleration of binomial trees, the Fourier transform in option pricing and much more. Throughout Mark Joshi brings his unique blend of theory, lucidity, practicality and experience to bear on issues relevant to the working quantitative analyst. "More Mathematical Finance" is Mark Joshi's fourth book. His previous books including "C++ Design Patterns and Derivatives Pricing" and "Quant Job Interview Questions and Answers" have proven to be indispensable for individuals seeking to become quantitative analysts. His new book continues this trend with a clear exposition of a range of models and techniques in the field of derivatives pricing. Each chapter is accompanied by a set of exercises. These
