Civil Engineer's Reference Book, Fourth Edition provides civil engineers with reports on design and construction practices in the UK and

overseas. It gives a concise presentation of theory and practice in the many branches of a civil engineer's profession and it enables them to study a subject in greater depth. The book discusses some improvements in earlier practices, for example in surveying, geotechnics,

water management, project management, underwater working, and the control and use of materials. Other changes covered are from the evolving needs of clients for almost all forms of construction, maintenance and repair. Another major change is the introduction of

new national and Euro-codes based on limit state design, covering most aspects of structural engineering. The fourth edition incorporates these advances and, at the same time, gives greater prominence to the special problems relating to work overseas, with differing client requirements and

This second edition of Linear Integral

Equations continues the emphasis that the first edition placed on applications. Indeed, many more examples have been added throughout the text. Significant new material has been added in Chapters 6 and 8. For instance, in Chapter 8 we have included the solutions of the

Cauchy type integral equations on the real line. Also, there is a section on integral equations with a logarithmic kernel. The bibliography at the end of the book has been extended and brought up to date. I wish to thank Professor B.K. Sachdeva who has checked the revised manuscript and

equation in which an unknown function appears under one or more integral signs Naturally, in such an equation there can occur other terms as well. For example, for $a \sim s \sim b$; $a : (t : (b$, the equations (1.1.1) $f(s) = ib \int_a^b K(s, t)g(t)dt$, $g(s) = f(s) + ib \int_a^b K(s, t)g(t)dt$, (1.1.2) $g(s) = ib \int_a^b K(s, t)[g(t)f(t)dt$, (1.1.3)

where the function $g(s)$ is the unknown function and all the other functions are known, are integral equations. These functions may be complex-valued functions of the real variables s and t .
