How Medical Tourism Is Helping Developing Countries. Dec 11, 2015. According to the Medical Tourism Association, Medical Tourism is where people who live in one country travel to another country to receive medical, dental and surgical care while at the same time receiving equal to or greater care than they would have in their own country, and are travelling for medical care because of affordability, better access to care or a higher level of quality of care.

Having similar characteristics, many developing countries are becoming increasingly competent in medical tourism, and might one day dethrone the traditional power of the industry. With the arrival of the postcolonial age and the socioeconomic developments in countries that are mostly known for being former European colonies, the growth of medical and tourism industries in these states became inevitable.

~~Medical Tourism in Developing Countries | Milica Z ...~~

In developing countries of tourist destinations, development in medical tourism can retain skilled medical professionals from migration abroad because it raises their wages. However, the expansion of medical tourism could lead to an outflow of skilled health workers from public healthcare sector to the medical tourism sector, and could crowd out the medical provision in the public healthcare sector.
