This volume provides educators with a global understanding of the challenges associated with equity and inclusion in higher education, and it provides evidence-based strategies for addressing the challenges associated with implementing equity and inclusion at higher education institutions around the world.

This book presents a showcase of discussions and critical perspectives about Nepalese higher education. Its chapters cover topics such as the impacts of local sociopolitical changes and global forces on public and private education, emerging online and distance education, administrative and intellectual leadership, quality assessment, graduate employability, global mobility of students, and the contributions of global diaspora of Nepalese scholars. The central questions of the book are: What are some of the local and global academic interactions in Nepalese higher education and what are the current challenges and pathways for advancements and improvements? How can Nepalese higher education absorb twenty-first century values of quality education as external forces, while adapting new developments to local needs? How can scholars interested in Nepalese, South Asian, and international higher education create opportunities for scholarship and professional collaboration around research on higher education in this region of South Asia? What issues and perspectives can research and scholarship about Nepal ' s higher education offer to international discourse in higher education? The book offers information and resources to international educators interested in the dynamics of Nepalese and, by implication, South Asian higher education by introducing key challenges in policy and programs, innovative changes in curricula, effective approaches in technology application, and strategies for future integration of global reforms in education.

This publication is part of a series of six country reports on technical and vocational education and training (TVET) and higher education in Bangladesh, Nepal, and Sri Lanka. Each report presents current arrangements and initiatives in the respective country's skills development strategies. These are complemented by critical analyses to determine key issues, challenges, and opportunities for innovative strategies toward global competitiveness, increased productivity, and inclusive growth. The emphasis is to make skills training more relevant, efficient, and responsive to emerging domestic and international labor markets. The reports were finalized in 2013 under the Australian AID-supported Phase 1 of Subproject 11 (Innovative Strategies for Accelerated Human Resource Development) of Regional Technical Assistance 6337 (Development Partnership Program for South Asia).

This book focuses on health, healing and health care in Nepal. It presents an intriguing picture: the interplay between the natural processes that cause ill health or diseases and the socio-cultural processes through which people try to understand and cope with them. The work places medical tradition, health politics, gender and health, and pharmaceutical business within the wider politico-economic milieu of Nepal. It also describes the establishment of medical anthropology as an academic discipline, and its relevance for understanding the country ' s specific health problems, health care traditions, and health policies. Combining scientific research with practical experiences, the book will serve as a unique resource, especially for health workers, policymakers, and teachers and students in medical schools, those in public health, social medicine, health care, governance and political studies, sociology and social anthropology, and Nepal and South Asian studies.

Quickly and decisively manage any medical emergency you encounter in the great outdoors with Wilderness Medicine! World-renowned authority and author, Dr. Paul Auerbach, and a team of experts offer proven, practical, visual guidance for effectively diagnosing and treating the full range of emergencies and health problems encountered in situations where time and resources are scarce. Every day, more and more people are venturing into the wilderness and extreme environments, or are victims of horrific natural disasters...and many are unprepared for the dangers and aftermath that come with these episodes. Whether these victims are stranded on mountaintops, lost in the desert, injured on a remote bike path, or ill far out at sea, this indispensable resource—now with online access at www.expertconsult.com for greater accessibility and portability—equips rescuers and health care professionals to effectively address and prevent injury and illness in the wilderness! This textbook is widely referred to as “The Bible of Wilderness Medicine.” Be able to practice emergency medicine outside of the traditional hospital/clinical setting whether you are in remote environments, underdeveloped but highly populated areas, or disaster areas, are part of search and rescue operations, or dealing with casualties from episodes of extreme sports and active lifestyle activities. Face any medical challenge in the wilderness with expert guidance: Dr. Auerbach is a noted author and the world's leading authority on wilderness medicine. He is a founder and Past President of the Wilderness Medical Society, consultant to the Divers Alert Network and many other agencies and organizations, and a member of the National Medical Committee for the National Ski Patrol System. Handle everything from frostbite to infection by marine microbes, not to mention other diverse injuries, bites, stings, poisonous plant exposures, animal attacks, and natural disasters. Grasp the essential aspects of search and rescue. Respond quickly and effectively by improvising with available materials. Improve your competency and readiness with the latest guidance on volcanic eruptions, extreme sports, splints and slings, wilderness cardiology, living off the land, aerospace medicine, mental health in the wilderness, tactical combat casualty care, and much more. Meet the needs and special considerations of specific patient populations such as children, women, elders, persons with chronic medical conditions, and the disabled. Make smart decisions about gear, navigation, nutrition, and survival. Be prepared for everything with expanded coverage on topics such as high altitude, cold water immersion, and poisonous and venomous plants and animals. Get the skills you need now with new information on global humanitarian relief and expedition medicine, plus expanded coverage of injury prevention and environmental preservation. Get guidance on the go with fully searchable online text, plus bonus images, tables and video clips - all available on ExpertConsult.com.

This little book is an ideal clinical skills reference for nursing students and junior health care practitioners. Its easy to navigate design and step-by-step approach allows for information to be accessed quickly to help students review skills while on placement and prepare for their OSCE exams. - Essential equipment tick lists helps ensure students know what they need to perform clinical skills. - All fields of nursing are covered with tips throughout to help students support every patient group. - Introduces different approaches to performing clinical skills in community and acute settings to help students and new practitioners feel confident performing the skill in any situation.

Introduction. Obstetric fistula is the presence of an opening between a woman ' s genital tract and urinary tract or between the genital tract and the rectum due to untreated obstructed labor or iatrogenic causes. This disease is characterized by the leakage of the urine and/or stools through the vagina. Objective: The general objective of this need assessment is to contribute in decreasing the obstetric fistula related morbidity Nepal by providing strong information that could help in struggle against Obstetric Fistula related morbidity. Methods: This is a cross-sectional study of 4 health sites in the Republic of Nepal between, November 1st 2011 and December 16th 2011. Data were collected on the prevention, the management, the social reintegration, the training and the research related obstetric fistula. Standard assessment tool, structured questionnaire for health workers and patient ' s interview were used. We have also performed a literature review on obstetric fistula in Nepal. Results: With the MMR of 281/100,000 live birth, it is estimated that there is 200 to 400 new cases of OF in Nepal each year leading to the overall 4300 prevalent cases. Our assessment shows that, obstetric fistula surgery is practiced in three sites with information verifiable on the registers and files. One fourth site is willing to be really involved in struggle against OF. None of the site is dealing with the five pillar of obstetric fistula. Two of three sites have OF surgery in permanent base while one site actually proceeds by camps. Even where surgery is practiced, there is still a need for training, nursing and surgical technical protocol related to obstetric fistula. Struggle against obstetric fistula is not really coordinated at the country and regional level. Conclusion and recommendations: We recommend elaborating a national strategy of struggle against the obstetric fistulas, to elaborate protocols for care, training tools; organize the struggle against obstetric fistula while founding on the five pillars that are the prevention, management, reintegration, training and operational research. While dealing with the national strategy, it is urgent to empower the facilities really involved in OF surgery and the one committed to start the program.

Social and Administrative Aspects of Pharmacy in Low- and Middle-income Countries: Present Challenges and Future Solutions examines the particularities of low- and middle-income countries and offers solutions based on their needs, culture and available resources. Drawing from the firsthand experience of researchers and practitioners working in these countries, this book addresses the socio-behavioral aspects of pharmacy and health, pharmacoeconomics, pharmaceutical policy, supply management and marketing, pharmacoepidemiology and public health pharmacy specific to low- and middle-income countries. While some practices may be applied appropriately in disparate places, too often pharmacy practice in low- and middle-income countries is directly copied from successes in developed countries, despite the unique needs and challenges low- and middle-income countries face. Examines key issues and challenges of pharmacy practice and the pharmaceutical sector specific to low- and middle-income countries Compares pharmacy practice in developed and developing countries to highlight the unique challenges and opportunities of each Provides a blueprint for the future of pharmacy in low- and middle-income countries, including patient-centered care, evidence-based care and promoting the role of the pharmacist for primary health care in these settings

Chinese universities are striving to integrate new educational elements such as student-centered learning, group learning, active learning, and learning by doing into current traditional curriculum systems for creativity development among young generations. However, the concept of creativity by its very nature is a complex term of many perspectives. It is necessary to clarify what creativity is, how creativity can be fostered in learning environments, and what universities should do in order to foster creative young talents. Introducing Problem-Based Learning (PBL) for Creativity and Innovation in Chinese Universities: Emerging Research and Opportunities is a critical scholarly resource that provides a multidimensional understanding on both challenges and opportunities of fostering creativity and PBL in Chinese universities and particularly discusses this implementation in a Chinese cultural context. Though related to a Chinese cultural context, the book can inspire other universities in other cultures, particularly in Asian areas, to learn why PBL is a potential strategy for creativity development and to rethink how to facilitate the innovation capability of universities in the future. Featuring a wide range of topics such as course design, educational technology, and curriculum development, this book is ideal for education professionals, academicians, teaching professors, researchers, administrators, and students.
