This volume brings together contributions that resemble spotlights thrown on the past twenty-five years of science and technology studies. It covers a broad range: history of science; science and politics; science and contemporary democracy; science and the public; science and the constitution; science and metaphors; and science and modernity and provides a critical overview of how the field of science and technology studies has emerged and developed.

The Second Edition of this acclaimed text helps you apply theory to real-world applications in mathematics, physics, and engineering. It easily guides you through complex analysis with its excellent coverage of topics such as series, residues, and the evaluation of integrals; multi-valued functions; conformal mapping; dispersion relations; and analytic continuation. Worked examples plus a large number of assigned problems help you understand how to apply complex concepts and build your own skills by putting them into practice. This edition features many new problems, revised sections, and an entirely new chapter on analytic continuation.

NCERT Exemplar Problem-Solutions These include Practice questions of various typologies and difficulty levels. They also contain conceptual problems which are a part of the CBSE Board Syllabus as well as the Syllabus of various Competitive Exams like IIT JEE, NEET, AIIMS, etc. These are based on the latest NCERT Exemplar Editions They have Oswaal Learning Tools for effective concept clarification CBSE Pullout Worksheet Chapter-wise worksheets with space for writing answers Latest Typology of Questions mentioned by CBSE, including MCQs Objective Type Questions for 2021 Examination Previous Years' Questions for exam oriented preparation Free Solutions available on our website www.oswaalbooks.com
