Data visualization is an interdisciplinary field that deals with the graphic representation of data. It is a particularly efficient way of communicating when the data is numerous as for example a Time Series. From an academic point of view, this representation can be considered as a mapping between the original data (usually numerical) and graphic elements (for example, lines or points in a chart).

Data visualization - Wikipedia

It is basically impossible to create something without imagining it beforehand. Visual imagery has been being used by psychologists for years, and visualization techniques are one of the ways that help people enhance performance at skill-based activities, create desired emotional states, and achieve life goals. For example, people who...

Creative Visualization - Pinterest

To be clear, creative visualization isn't really a technique at all. It's a process one embarks on that is kind of like meditation in that there is the intent to focus on one thing, which lets the rest fall away. In meditation, the concentration (especially for those that are new to it) is usually on breathing.
