A guide coat is a very thin layer of paint applied to an opposing color of the primer coat. This is done when preparing a car for final paint. The 1967 Chevrolet Camaro pictured here is getting a top quality, show winning finish. That means the panels have to be perfectly straight. This is the step in the process where we use a guide coat.

What is a Guide Coat - Renown Auto Restoration Blog

A guide coat is a light misting of paint or primer in a contrasting color above each coat of primer. I use rattle-can "sandable primer." In Figure 1 you can see that the guide coat (black) is misted over the primer coat (grey). The purpose of this coat will become obvious as you begin to sand the primer. Next time we'll go over the process of sanding down this guide coat and you'll see exactly what function the guide coat serves.
